

Newsworthy Issue #5 – Week of March 5th, 2023

We want to hear from you and encourage you to share this newsletter with your faculty and spark conversations with relevant departments for more information.

- The Material Science and Engineering Department hosted a thought-provoking event titled "**Future of Energy**" that welcomed participants from different regions of the Kingdom. This event provided attendees with insights into the present and future of energy, its applications in various industries, and a networking opportunity within the field.
- The **ISA-KFUPM Students Section's** officers, members, and some Control and Instrumentation Engineering Department faculty members visited **ABB Group** in Dammam for an informative tour around the facilities.
- The **first spectrally resolved data with femtosecond time resolution** has been produced at the CPG femtosecond laser lab. The lab is fully operational in the UV range and is open to collaborations.
- The Applied Research Center of Environmental and Marine Studies team succeeded in **tagging the first juvenile sea turtle** in Saudi Arabia at Karan Island.
- The **graduation ceremony** took place at the stadium with great attendance from families, and friends to celebrate the 53rd batch of KFUPM graduates. With the combined effort of several departments and student clubs, the organization and coverage of the event were a success.
- The President will give a talk on the topic of transforming academic institutions to align with future global trends on March 14th during the **Dhahran Geoscience Society Dinner**. To attend, please register at shorturl.at/pAX08
